

## Jack Dilworth

Bsc(Hons) PGDip LA

### Director

Jack has a background in science and he is inspired by innovative and contemporary design. Jack completed a BSc (Hons) in Neuroscience at Bristol University where he specialised in human memory and evolution of perception before converting to Landscape Architecture in 2010 with a Post Graduate Diploma. Somehow, he found the common ground between both disciplines. Over the past 9 years he has gained valuable and varied experience in award winning practices in London, Hampshire and Gloucestershire. Jack has worked as a lead designer on many high profile schemes in London and around the world. Jack's expertise centre around large scale and often high density residential and mixed-use developments, public realm design, masterplanning resorts and business parks. Jack frequently presents at Design Review Panels, Local Planning Authorities and to the Greater London Authority. He enjoys the challenge of using landscape as a genuine tool for enhancing challenging inner city developments.

### NOTABLE PROJECTS

#### **THE TRIANGLE, NEWHAM, LONDON**

Practice: BD Landscape Architecture  
Client: Red Door Ventures  
Architect: dRMM  
Status: planning granted in 2017  
Role: Project Lead + Designer

A mixed use development in Newham, East London comprising of a tower and cascade of buildings located close to the River Thames. Landscape proposals included technically challenging public realm improvements, a series of rooftop communal gardens, play spaces and habitat zones. A challenging scheme due to the physical constraints of the site. The scheme was granted planning permission in 2018. For more information click on the project title link.

#### **PORTAL WEST, ACTON, LONDON**

Practice: Outerspace UK Ltd  
Client: City and Docklands  
Architect: BUJ  
Status: planning granted in 2016  
Role: Project Lead + Designer

A mixed use 620 unit development in Acton, West London comprising of a cluster of towers positioned around a central communal space for residents, roof gardens and surrounding public realm improvements. A challenging scheme due to the scale and density of the proposals. The landscape proposals played a central role during a lengthy pre-app process. The scheme was granted planning permission in 2016. For more information click on the project title link.

#### **ARK EdCITY, WHITE CITY, LONDON**

Practice: BD Landscape Architecture  
Client: Ark Education  
Architect: Sheppard Robson  
Status: planning granted in 2018  
Role: Project Lead + Designer

The redevelopment of an outdated and under-used primary school site to deliver a new, state-of-the-art primary school, nursery, youth activity zone, adult education centre, collaborative office space and client HQ and affordable residential units for key workers. Landscape proposals include significant public realm improvements comprising of an extensive and ambitious SUDS system, urban forest, school play spaces, roof top teaching spaces, sports facilities, communal gardens for residents, office terraces, green, brown and blue roof systems. For more information click on the project title link.

#### **ORCHARD WHARF, TOWER HAMLETS, LONDON**

Practice: Outerspace UK  
Client: Galliard Homes  
Architect: BUJ  
Status: planning granted in 2016  
Role: Project Lead + Designer

A mixed use development located on the west bank of the River Lea delivering 338 new homes in a 23-storey tower and stepped blocks of 20, 17, 14, 11 and eight storeys. Landscape proposals include a podium level communal garden with internal and external play spaces for a range of ages, recreation space for older residents, a series of rooftop gardens and public realm street level improvements. For more information click on the project title link.

### **THE MATERIAL STORE, HAYES, LONDON**

Practice: BD Landscape Architecture  
Client: HUB and Fizzy Living  
Architect: Newground Architects  
Status: Completed in 2018  
Role: Project Lead Through Construction

The Material Store is a 189-dwelling, build-for-rent scheme that forms part of the redevelopment of The Old Vinyl Factory site in Hayes, once the home of the EMI record pressing plant. Landscape proposals sought to create a community atmosphere by providing a variety of social spaces within a shared garden for residents of all ages. This included a dining area with BBQ, a sculptural lawn, private terraces and a play area. Green spaces include a garden at podium level, a series of green/brown roofs across the taller blocks and smaller shared social spaces at roof level. For more information click on the project title link.

### **WEST GREEN PLACE, HARINGEY, LONDON**

Practice: BD Landscape Architects  
Client: Pocket Living LLP  
Architect: HTA + Dyvik Kahlen Architects  
Status: Planning granted in 2017  
Role: Project Lead + Co-designer

Pocket Living specialise in delivering affordable new homes for those who live and work locally. Pocket actively encourage innovative design to overcome site constraints and encourage a lively community atmosphere. Landscape proposals provide a high quality shared surface across the new street and two new squares, an orchard, food growing beds, communal and private gardens, green and brown roofs, improved access to the wider area and substantial tree planting bringing the character of the adjacent award winning park into the scheme. For more information click on the project title link.

### **TREGO ROAD, HACKNEY WICK, LONDON**

Practice: BD Landscape Architects  
Client: City and Suburban Homes  
Architect: pH+  
Status: Planning Approved  
Role: Project Lead + Designer

A new mixed-use scheme providing commercial space at street level and 52 new homes. This innovative design sought inspiration from how the people of Fish Island currently adopt underused spaces to create shared social endeavours. Landscape proposals look to enrich a series of small private and shared terraces created by the dramatic tired cascade of the architecture by introducing trees, green walls and abundant planting at all levels of the building. The scheme provides communal space for residents, play space for children and crossover shared courtyards. For more information click on the project title link.

### **QUEEN MARY'S UNIVERSITY, MILE END CAMPUS, LONDON**

Practice: Outerspace UK  
Client: Queen Mary's University  
Architect: WilkinsonEyre  
Status: Completed in 2017  
Role: Project Lead Through Construction

The landscape design creates a series of high quality courtyard spaces befitting a world leading educational institution. The character of the proposals borrowed principles from established university campus traditions and brought them into the modern era. High quality materials were used innovatively to overcome existing site constraints and create an accessible landscape. The courtyards contain raised lawns, food growing areas, SUDS and monumental trees to create a calming and enriching experience while maintaining an impression of grandeur. For more information click on the project title link.

### **SKOLKOVO RESIDENTIAL PARK, MOSCOW**

Practice: Hyland Edgar Driver  
Client: Queen Mary's University  
Architect: TPO Reserve  
Status: Complete  
Role: Project Landscape Architect and co designer  
Awards: European Property Award 2016-2017

Skolkovo Residential Park sits close to central Moscow on the fringe of the emerging business and enterprise region of Skolkovo. There are six apartment buildings, a gym and health spa forming a distinctive sweeping design in the 8.7 hectare landscaped site which includes feature gardens, sculptural lawns, riverside walks and children's play areas. HED was appointed to design from concept the public realm areas and private landscape gardens of the development to a detail design level. This included all hard landscape areas; paving, riverside boardwalk, planting and water feature elements.

### **DUKE RESTAURANT, ISTANBUL**

Practice: Hyland Edgar Driver  
Client: D&D London, Sele Istanbul  
Architect: Conran and Partners  
Status: Completed  
Role: Project Landscape Architect and co designer

Duke is a joint venture between renowned British and Turkish restaurateurs: D&D London, Sele Istanbul and Mehmet Ali Yalçındag. The new restaurant sits on the podium level of Istanbul's Trump Towers, offering stunning views of the city. The restaurant opens onto a huge terrace with stunning views of Istanbul, and generous windows mean the whole space is dramatically transformed from day to night. A simple palette of quality materials provides clarity, calm and a sense of luxury. The planting scheme provides the restaurant with the freshest ingredients for use in the kitchen.
